

# GPL ISO 3821 EN 559

- 1 Cover in orange soft NBR/EPDM
- 2 Textile reinforcement
- 3 Inner tube in black soft NBR

## APPLICATIONS

LPG (butane, propane...), gas welding.

## MARKING

NF EN 559 - ISO 3821 - PROPANE - 2 MPa (20 BAR) - Ø inn - TRICOFLEX - [year of manufacturing]\* - made in EU

\* Year of production written in the marking is not a date of substitution.

## Flexible rubber hose for LPG.

### ADVANTAGES

This hose complies with ISO 3821 standard. It is very flexible (even at low temperature) and has a very good resistance to abrasion giving a longer service life. It can be used in any climatic conditions.

### CONNECTORS

Usual connections for gas welding.  
Worm drive or 'O' type ring clamps.  
Crimping is possible with non damaging connectors.
