

SPIRABEL® SISE *

**700**
mbar**12**
bar**+60**
- 25
°C

- 1 Anti-impact rigid PVC spiral reinforcement
2 Flexible, smooth PVC bore

APPLICATIONS

Agricultural spraying, seed drills.

WITHOUT MARKING

Multipurpose hose, flexible in cold conditions.

Reinforced with a rigid, shock-resistant PVC spiral within a black soft PVC wall.

ADVANTAGES

SPIRABEL® SISE has a good resistance to vacuum and is very flexible even in cold weather thanks to its special PVC wall.

Its smooth inner wall assures low flow losses, avoids retention zones and assists cleaning. SPIRABEL® SISE can be used to transfer food liquids and even alcohol up to 50% at 60°C.

CONNECTORS

Symmetrical connectors (Guillemin or Storz) with wire clamps as cover is not smooth. Swage fittings and band clamps are not advised as they could lead to leakage or spiral break. We recommend checking before assembly that the fittings cannot harm the inner wall.

CHEMICAL RESISTANCE

See table pages 110 to 113 column A.

WARNING

Spiral hoses in general have an elongation under pressure that can be important when temperature is above 40°C. This has to be considered before installation. We remain at your disposal for any question on this issue.
