Flexible hose for heavy-duty industrial applications.
Rigid shock-proof PVC, reinforced spiral in flexible PVC wall.

APPLICATIONS
Emptying and draining, equipment for lorries and liquid slurry tanks

SECTORS OF ACTIVITY
General industry, agriculture, road works, civil engineering

ADVANTAGES
The new generation of suction and delivery hoses with shockproof PVC reinforced spiral for the highest demands on quality and performance. Robust and easy to handle, versatile in use, convincing in its application. The SPIRABEL® MDSE is very flexible and suitable for use at low temperatures down to -25 °C.
• Smooth interior and exterior
• Robust construction
• Abrasion resistant
• UV, ozone, weather resistant
• Good chemical resistance
• Application temperature: -25 °C to +60 °C

CONNECTORS
Guillemin or Storz symmetrical connectors, cam or universal joint connectors – Fixings with single-thread or spiral collars (SERFLEX). Crimping and band collars are not recommended as they do not ensure a perfect leak-proof connection and increase the risk of the spiral being crushed and breaking.

CHEMICAL RESISTANCE
See table pages 102 to 105 column A.

WARNING
For transfer of oil we recommend the use of SPIRABEL® MDSO.
Spiral hoses in general have an elongation under pressure that can be important when temperature is above 40 °C. This has to be considered before installation. We remain at your disposal for any question on this issue.
