

SPIRABEL® BALNEO ANTI-TERMITES

 990 mbar	 18 bar	 +60 - 15 °C
---	---	--

- 1** Chlorine-resistant PVC inner layer
- 2** Shock-resistant rigid PVC spiral
- 3** Flexible, termite-resistant PVC wall with smooth inner and outer wall.

APPLICATIONS

Swimmingpools and spas.

MARKING

SPIRABEL BALNEO ANTI-TERMITES Ø out [Batch number]

Hose reinforced with a rigid spiral

Shock-resistant white PVC spiral embedded in a flexible PVC core.

ADVANTAGES

The SPIRABEL® BALNEO ANTI-TERMITES is a flexible spiral PVC hose designed for underground swimming pool installations.

Its anti-termite formulation 12-year guarantee provides long-lasting protection against insect attacks, while its spiral structure ensures excellent crush resistance. The smooth inner and outer walls make installation easier and improve water flow.

Compatible with pool fittings and water treatment systems using chlorine or salt electrolysis, it offers a reliable, durable solution for underground networks. Compliant with ISO 3994, a guarantee of quality and reliability.

CONNECTORS

Standard swimming pool fittings for push-on hose connections and solvent-bonding (recommended adhesive: 3M™ 4475).

CHEMICAL RESISTANCE

See table column A.

WARNING

Spiral hoses may exhibit elongation under pressure, which can become significant at temperatures above 40°C. This should be considered prior to installation. For further information, please contact us.
